Metric is a modern texture offering simple, useful sophistication. A cross-dyed textile, it's woven with two types of polyester fiber which, when dyed, reveal a refined two-tone woven structure. Metric offers an expansive palette, including a full range of neutrals, as well as saturated and bright accents in mustard, raisin, carnelian, emerald, cobalt and rust. Constructed to provide stretch for easy upholsterability, Metric is suitable for application on all seating types, as well as upholstered walls. In keeping with Maharam's commitment to reduced environmental impact, Metric is constructed of 51% Post-Industrial Recycled Polyester. In addition, Metric is Greenguard Certified and Greenguard Children & Schools Certified for low emissions.

New York-based Maharam offers a comprehensive collection for contract and residential applications. Maharam textiles are available to the trade and at select retail locations in North America, through its Danish partner Kvadrat in Europe, through Kvadrat Maharam in Sydney and Dubai, and via a network of distribution in Asia.
