The most recent indoor/outdoor textiles developed by the Maharam Design Studio, Cursive and Brim offer crisp, graphic designs at a bold scale.

Cursive arose from an interest in adding a large-scale organic pattern to Maharam's offering of indoor/outdoor wovens. With its continuous loops of parallel lines and tonal coloration, Cursive achieves a balance between fluidity and complexity. An all-over design, the entwining pattern allows the eye to travel seamlessly across the textile.

Brim, on the other hand, is characterized by its clean, architectural attributes. An unusual application of color introduces rhythm and movement to vertical columns of evenly stacked bars in a palette of earthy neutrals with a variety of soft brights.

As performance-based products, Cursive and Brim are woven of solution-dyed fibers, offering a high degree of color- and light fastness and ease of cleanability. Additionally, in keeping with Maharam's commitment to reduced environmental impact, both textiles are Greenguard and Greenguard Gold Certified.

Maharam offers a comprehensive collection of textiles for commercial and residential interiors.

### **SPECIFICATIONS**

PATTERN	WIDTH	COLORS	CONTENT
Cursive	54"	8	67% Solution-Dyed Acrylic, 33% Solution-Dyed Polyester
Brim	54"	7	67% Solution-Dyed Acrylic, 33% Solution-Dyed Polyester

# Cursive and Brim
